

## ROUND TABLE BETWEEN AIO EXCOM AND REGULATORS

### RECOMMENDATIONS

#### **Premium Flight**

- Be intentional in keeping premium in Africa via a regulator's framework restricting flight out of Africa.
- Extend national/regional restrictions to embrace a more continental approach (CIMA Case). The fight isn't amongst African states.
- Have a dashboard of the portfolios that are being externalized and we focus and be intentional about retaining them.
- OAISA should invite AIO to present the full report during their General Assembly Meeting.
- OAISA and AIO should come together to develop modern legal frameworks for the continent which are harmonized across.
- Regulators can develop a framework to facilitate trade (movement of capital), and together with AIO develop a roadmap for implementation.

#### **Inclusive Insurance**

- Regulators need to develop a regulatory framework for inclusive insurance and ensure that regulation/legislation does not act as a barrier for the development of the inclusive insurance
